Record

Lecture Capture app allows you to create recording of your screen in few simple steps. From the main screen tap on the Create New Recording. Than pick the title of your new recording, and tap on the Start Recording button. Lecture Capture app will record your activity including drawing using your fingers on the screen and audio. You can also add images or make a new to server as a background for the recording.

To finish recording tap on the Done button.

The newly finished recording will appear in the list on the left side of the main window.

Watch

You can watch and review your recordings in the Lecture Capture App. From the main window tap on the any item from the list. Tap on the play button that will appear in a right part of the screen. The list will show your information about title like size or title. It will also show the URL if the recording was previously uploaded to the server.

Share

Lecture Capture app provides several different ways of sharing your recordings. The files under 100 MB can be uploaded to application's server. In order to do it:

1 Register and login to your account.

2. Select the video from the list on the left

3. Tap on the Upload Recording button.

4. Wait. The operation might take up to several minutes, depending on the size of the file and your network connection.

5. Share your recording by passing URL of the recording.

Lecture Capture App allows you also to save your recordings to Media Library. Once you do it you can access your video from the Apple's Camera app.
